The connection socket is the AdBlue tank socket.

Socket   Emulator

Purple / White ------------------> White Cable (CAN H)
Purple ----------------------------> Brown Cable (CAN L)
Black -----------------------------> Black Cable (-)
Orange ---------------------------> Red Cable (+)

NOTE: NOx sensors should be isolated by removing them. The emulator should be isolated so that it does not get water. This socket will not be plugged in again as it is mounted on the Adblue Tank socket.
